HOUSTON, SEPT 7 - Stanford University's Geophysics Department Chairman, the Honorable **Dr. Jerry Harris** will give the keynote address at the **NABGG 2004 Luncheon** that will be held on **September 16, 2004** at 12:00 PM at the Doubletree Club Hotel, Austin Texas.

Dr. Jerry Harris, SEG Distinguished Lecturer, is widely known in the field of geosciences, with broad experiences in both the corporate and academic arenas of the industry. His developments in the areas of acoustical resonance spectroscopy, reservoir geophysics, and crosswell technology are utilized in seismic exploration activities by many major oil and gas companies.

Stanford University's Geophysics Department currently is involved in the following research activities: Biological oceanography, earthquake mechanics, environmental investigations, rock physics, reflection, refraction and tomographic seismology, studies of continental geomechanics, studies of crustal deformation and theoretical and computational geophysics. Visit their website for further details: <http://pangea.stanford.edu/GP/geophysics.html>

NABGG has supported undergraduate and graduate students in the geosciences for over 23 years. NABGG is a non-profit, organization headquartered in Houston, Texas and involved with national and international energy policy and geoscience related issues. For more information, please visit NABGG's Web site at: <http://www.nabgg.org>
